[VIEW RECORDING - 80 mins \(No highlights\)](#)

[Introduction and background @ 0:00](#)

Tim presented his team's ambitious ontology mapping work between Provo and BFO/CCO, having overcome challenges others failed at. Carter praised their success and suggested publishing to promote reuse.

[Mapping challenges and accomplishments @ 0:38](#)

Through struggles, Tim's team developed strategies for representing qualified relations and activities as agents, highlighting tensions between practical and metaphysical perspectives. Their modular mappings and annotations enabled new inferences.

[Future directions and publication plans @ 58:10](#)

Carter strongly recommended a nature paper on lessons learned. He and Tim agreed a refined CCO-specific module could help new users model provenance more easily. They will meet Tim Lebow to discuss publishing and improving the mappings.
